

STF 16/180

STF 15/610 with 3216P1 programmer and L stand options

**The Carbolite Gero STF single zone and TZF 3-zone high temperature tube furnaces are available at 1500°C and 1600°C with both models using silicon carbide heating elements.**

This range of tube furnaces does not include an integral work tube and one must be selected as an additional item. The work tube length is dependent on the application eg for use with modified atmosphere or vacuum. This information can be found on pages 98–99.

The TZF 3-zone high temperature tube furnace has heated lengths of 450 and 610 mm. An extended uniform zone in the mid-section of the work tube is achieved with the use of end zone controllers which track the centre zone temperature and compensate for the loss of heat from the tube ends.

### Standard features

- 1500°C & 1600°C maximum operating temperatures
- Carbolite Gero 301 controller with single ramp to setpoint and process timer
- Accepts work tubes up to 60 or 90 mm outer diameter depending on model
- Heated lengths, single zone 180, 450 or 610 mm (STF)
- Heated lengths, 3-zone 450 or 610 mm (TZF 15, TZF 16)
- Silicon carbide heating elements
- Horizontal configuration

### Options (specify these at time of order)

- A range of sophisticated digital controllers, multi-segment programmers and data loggers is available. These can be fitted with RS232, RS485 or Ethernet communications (see pages 94 – 97)
- Over-temperature protection (recommended to protect valuable contents & for unattended operation)
- Alternative mounting options are available (see page 51)
- Optionally configured for 2 phase or 3 phase electrical supply (depending on model)
- A range of additional work tubes (pages 98 – 99) and end seals (page 102) or work tube packages (pages 100 – 101) are available
- Insulation plugs & radiation shields to prevent heat loss & improve uniformity
- Control module with 2 metre conduit to furnace (TZF 15, TZF 16)
- Hook and strap work tube support (see page 102)

### View inside

TZF 15/610 with 3508P1 programmer

- 1) Centre zone heating element
- 2) End zone heating elements
- 3) Control thermocouples
- 4) Thermal insulation
- 5) 3-zone temperature control
- 6) Work tube

**i Please note:**  
 - Heat up rate when using an optional ceramic work tube must be limited to 5°C/min  
 - Heat up time is measured to 100°C below max, with no work tube fitted and with end plugs fitted

- Maximum continuous operating temperature is 100°C below maximum temperature  
 - Uniform length measured with insulation plugs fitted.
